

KIMBLE CHARTING SOLUTIONS

Helping People Capitalize on the *"Power of the Pattern"*

Coffee With Chris

While you're having a cup of coffee/favorite beverage over the weekend, I wanted to share a few things about this past week/month that look to be important and could be creating opportunities going forward.

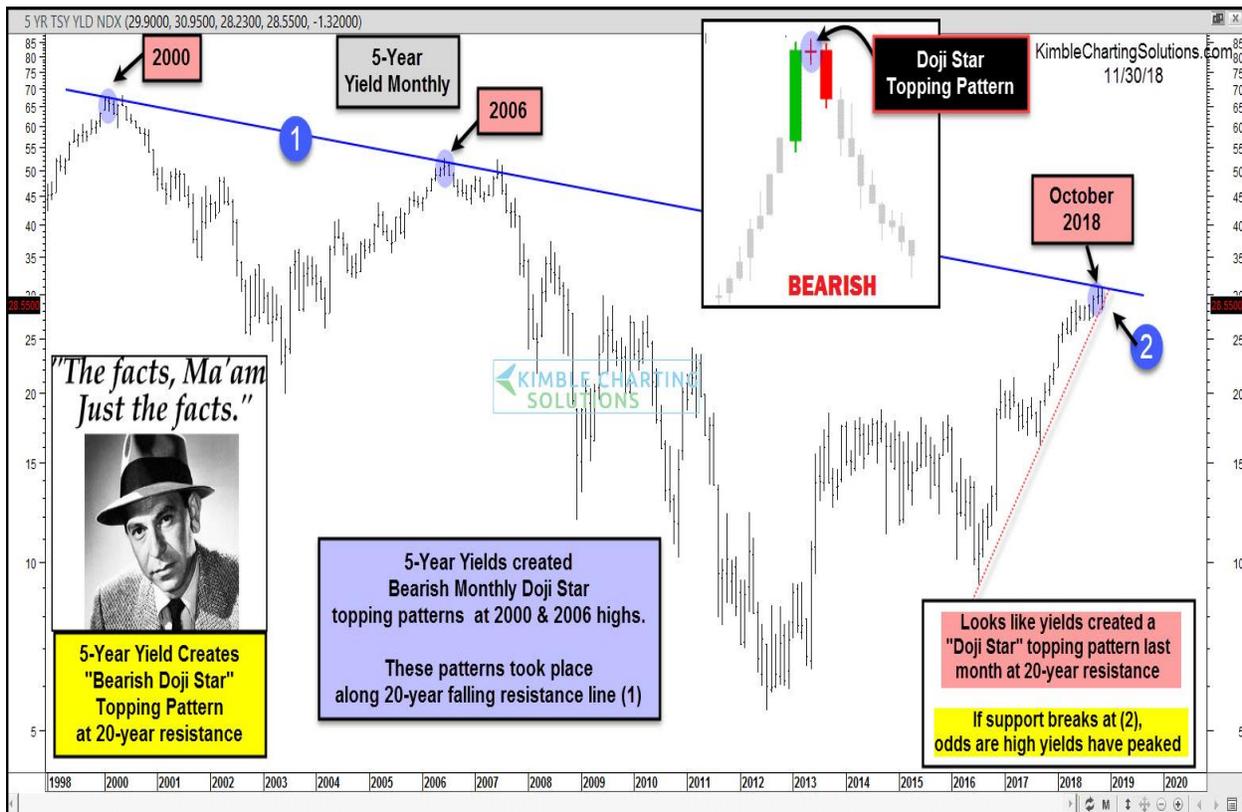

A reminder to old and new members, **Kimble Charting Solutions** is **NOT** about being **bullish or bearish**. Our goal is to seek out opportunities regardless of market direction.

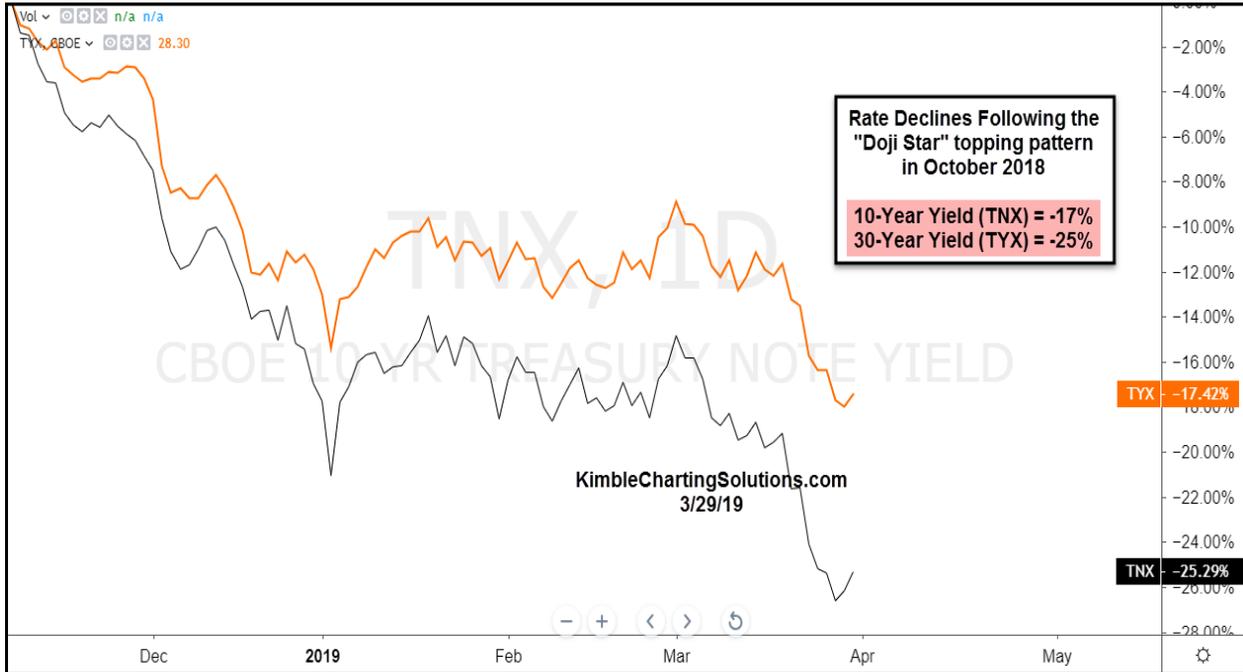

Small Pattern Can Lead To Big Movement!

The above graphic highlights a “Doji Star” pattern, which **can take place at significant highs**. When the pattern forms, it is *tiny* (not much up or down movement), and it is easy to overlook.

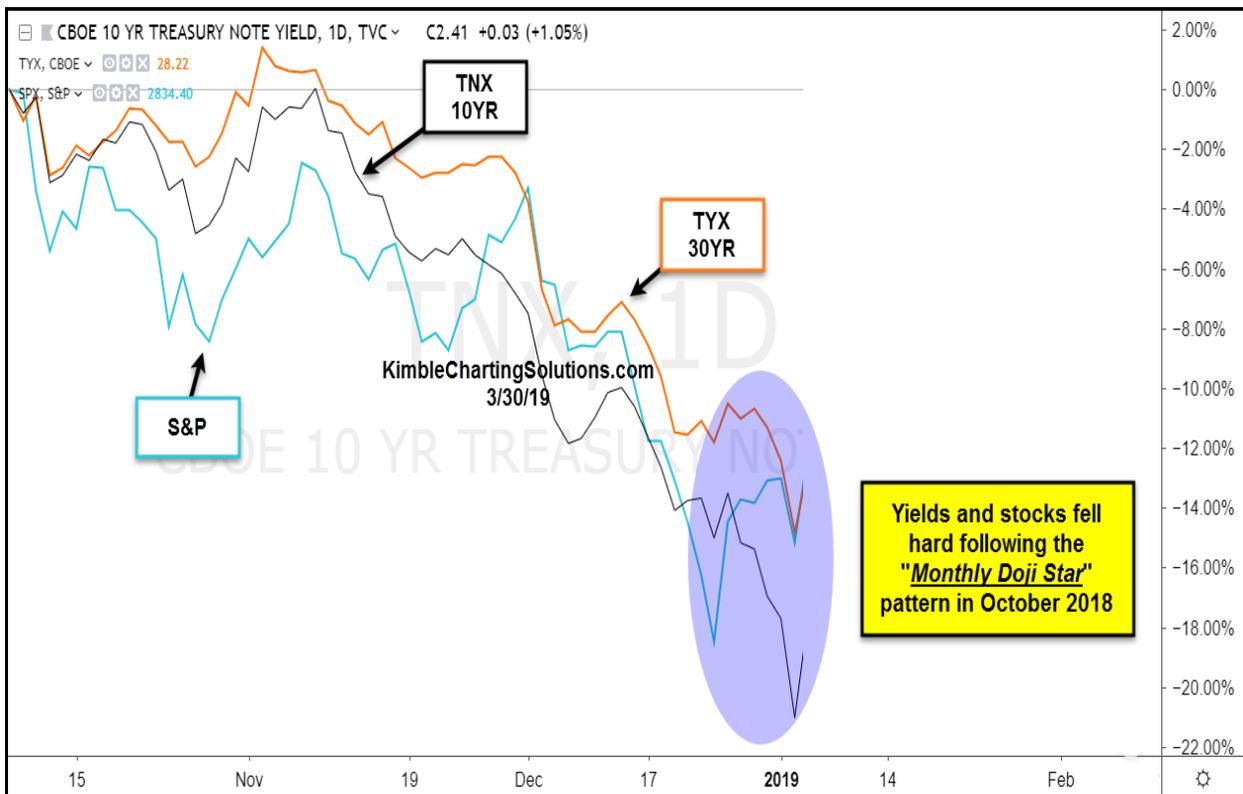

The chart below was published on Zero Hedge in November of last year. To see this post [CLICK HERE](#). This chart highlighted that a “Monthly Doji Star pattern had taken place while the 5-year yield was testing 18-year falling resistance.”

What happened to Yields Stocks following the Doji Star Pattern last fall? See below

Not only did yields fall hard, the S&P did as well!

Yesterday was the last day of March, and a couple of Monthly patterns caught my attention. This chart looks at the S&P on a monthly basis. **What pattern took place at the 2007 highs? A Monthly Doji Star!** Did another Doji Star topping pattern take place last month in the S&P 500? **Possible**

Did a Doji Star topping pattern take place last month in the NYSE index as it was kissing the underside of falling resistance? Possible!

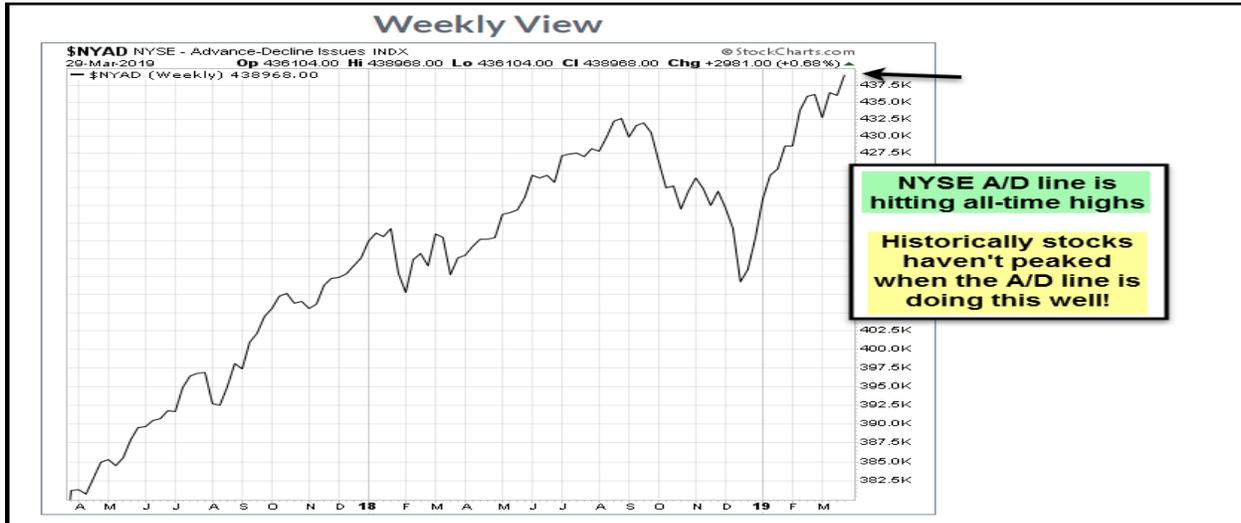

Did a Monthly Doji Star pattern take place last month in the DAX, while it was kissing the underside of the neckline of a bearish head & shoulders topping patterns? Possible

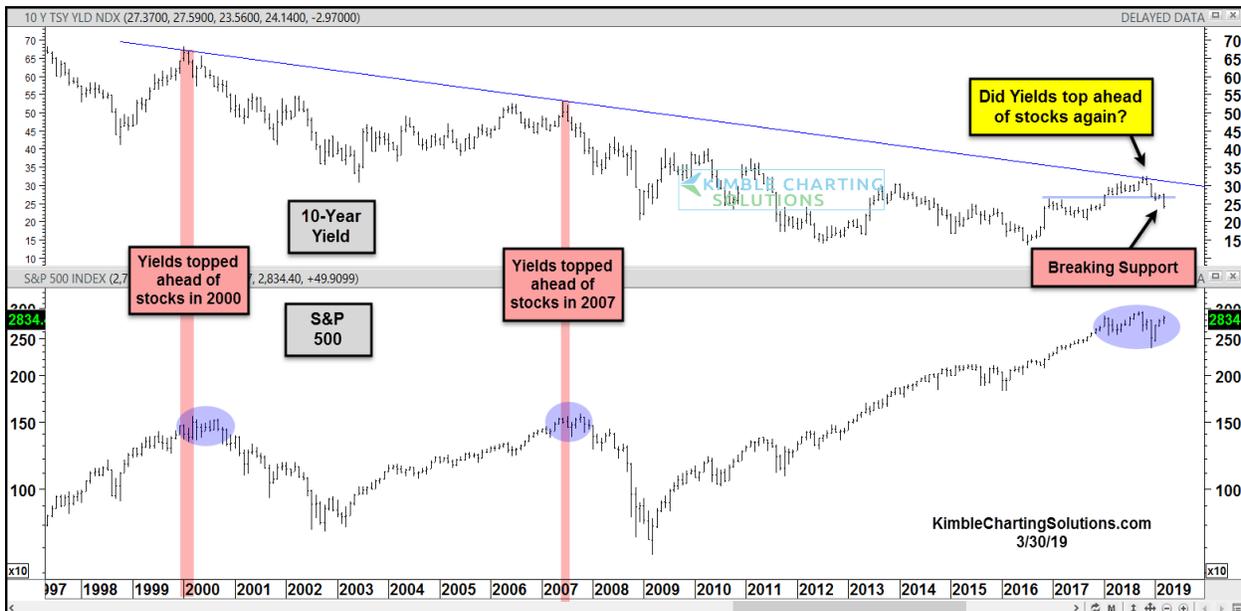

Did the S&P create a monthly Doji Star pattern at the right shoulder of a bearish head & shoulders topping pattern? Possible!

Adv/Dec line remains strong, which historically is a positive for stocks.

Below looks at the yield on the 10-year note and the S&P 500. In 2000 and 2007, yields peaked a few months ahead of stocks and then both proceeded to fall hard. Yields at this time looked to have peaked last fall and weakness of late has them breaking below support this past month.

It could take a few weeks to see if the Doji Star patterns are reflecting that a key top is in play. I will be discussing these patterns in greater detail in this week's upcoming Premium Members webinar and upcoming reports.

Have a great weekend everyone!

If you have any thoughts or questions about these patterns I welcome them.

Please send them to Kimblechartingsolutions@gmail.com.

Best Regards,

Chris Kimble
